Powerhaul Prep Achievement (Obtain Quickly): ----- Written by Zenko Kitsune This is a simple step-by-step guide on how to achieve the Powerhaul Prep Achievement in around 30 minutes -->Powerhaul Prep (Coupled to 1,000 Cars)-- * First you want to load service. I chose the locomotive SD40-2 YN3b and the service U876 – B – Coal - Loading on shaw mine. * When the game is loaded, first sit in the Headquarters of engineers (If not). * Next go to external camera mode. Personally, I chose camera 3 (number 3 on the keyboard). * Now use the arrow keys and mouse to place the camera directly in front of the car. * Still in external camera mode, locate the Steamer, which was found between the locomotive and the car until the Steamer prompt appears. * Simply hold the left click switching between 'Locked pair' to 'Unlocked Pair' and do so until the achievement is unlocked. This procedure can be performed in quick succession if you order clicks correctly. * If the locomotive or car becomes wide separate simply move the loco back into the car. * While you are doing this, it is possible to squeeze the car and the locomotive out of the extrusion, which was prompted by this service error message – extrusion of the vehicle. If this happens, simply select Answer Service and repeat the procedure. * Make sure you sit in the locomotive as this will not work if your position. Visit Cheatinfo for more Cheat Codes, FAQs or Tips! Spotlight - The new version of CheatBook DataBase 2020 Cheatbook-Database 2020 is a freeware cheat code tracker, which makes tips, Tricks, Tips and Cheats (for PC, Walkthroughs, Xbox, Playstation 1 | 2, Playstation 3, Playstation 4, Sega, Nintendo 64, Wii U, DVD, Game Boy Advance, iPhone, Game Boy Color, N-Gage, Nintendo DS, PSP, Gamecube, Dreamcast, Xbox 360, Super Nintendo) is easily accessible from some central location. If you are an enthusiastic player and want some additional weapons or lives to spend up to the next level, this freeware cheating database can come to the rescue. This database, which covers more than 25,300 games, represents all genres and focuses on recent releases. All fraudsters inside from the first CHEATBOOK in January 1998 to the present day. Date of publication 5 January 2020. Here is a complete list of commands. While some of them are standard UE4 commands for games, the features of most TSW-specific commands are not yet known. General information about commands[edit | edit source] All commands can be associated with vertical lines (|) to delimit each command. For example, you could use the following group of commands to create a stormy wet evening: ts2.dbg.SetCloudiness 1 | ts2.dbg.SetPrecipitation 1 | ts2.dbg.SetWindStrength 50 | ts2.dbg.SetLocalDateTime 2020.05.02-19.00.00 Camera built into the UUUU is very useful. You can activate it by using the ToggleDebugCamera command. While the camera is active, trains under your control can overrule the boundaries that would normally interrupt the seed. This is useful for exploring areas outside the boundaries imposed by the game itself. While you can't control a train when the camera is active, you can quickly switch back with the same command as before. Environmental commands[edit | edit source] There are several environmental commands that allow the user to quickly switch between weather and light conditions. These commands are useful when it comes to screenshots, as well as simulating dynamic weather during a scenario. The image below shows the same scene under different weather conditions: Several useful environmental commands: ts2.dbg.SetCloudiness // Sets the amount of cloud, zero is clear of the sky and one is completely top plain. <t0-1>ts2.dbg.SetGroundSnow // Sets the amount of snow, zero being snow, one being the maximum <t0-1>snow. ts2.dbg.SetPiledSnow // Sets the amount of piled snow, zero being none, one being the maximum. ts2.dbg.SetPrecipitation // SetPiledSnow // Sets the amount of piled snow, ts2.dbg.SetWindAngle // The floor is set on fire, zero is <t0-1> <t0-1> <t0-360>North, 90 East, 180 is South, 270 is West. ts2.dbg.SetWindStrength // Set up wind, zero is 100 is oedo. ts2.dbg.SetTemperature // Podeša temperature of the surrounding area in Celcius, sa nulom i u less than the tezine, falling as <t0-100> <t0>snow. ts2.dbg.SetLocalDateTime <YYYY. MM.DD-HH.MM.SS> // Specifies the date and time of the game. Signaling commands[edit | edit source] Console commands can be used to change signals and route settings, allowing the Player to access map areas that are not normally accessible. It's important to remember that dispatcher has full control, so if the dispatcher has set the path, you can't override it. If you want to bypass this problem, you can start the game just before 00:00, when the clock goes 00:00 The Dispatcher surrenders route control, this allows you to set the routes as you want. You can then use the SetLocalDateTime command to return to the desired time. Useful signalling commands:<YYYY. MM.DD-HH.MM.SS> <t/0> <t/0-100> <t/0-360> <t/0-1> <t/0-1> <t/0-1> <t/0-1> <SignalD> // This command allows you to set the route from <t;Route id=>one signal to the next. The signal ID is on the panel that is attached to most signals, and the signal recognizes it. For ground signals, they are expressed as shown on the signal (br880 for example). For the main signals, they are expressed by an underscore between the alpha and the numeric part of the ID (BR_881 for example.) Each signal has one or more routes controlled by it, expressed as a number from 0 and up. See examples below for futher explanation: To set zero paths on this earthly signals, use the ts2.signals.SetRoute 884 0 command to set route 1 on this main signal. Benefit from commanddu ts2.signals.SetRoute_D_941 1 Modding Tools Editing Tools - Simugraph Guides Console Commands Cheats. game codes, unlockables, hints, easter eggs, glitches, guides, walkthroughs, trophies, achievements, screenshots, videos and more for Train Sim World on Xbox One. Genre: Simulator First Release (Any platform): Train Sim World® CSX Heavy Haul is an all-new First-Person Simulator that revived the experience of operating powerful and heavy freight trains on one of America's most stunning and famous railways: Sand patch Class. We also have a side to this game on... Ask Question / Get Help Train Sim World® 2020 > General Discussions > Topic details Some new tips (fraudsters?) drive on time Here are some tips I came up with while driving GWE 166.Tip 1: Don't wait for The Goal full message to come up and disappear again before you make your next move. It costs precious seconds. For example, when you arrive at the station, don't wait until the full Goal message disappears, but unlock them immediately as if the Target message isn't there. The same goes for when you need to leave: don't wait to lock the door again until the objectively complete message disappears before you use the gas: start driving already (unless you're on time and you have to wait). Tip 2: If you want to save more seconds, take it further than tip 1. I think you can call the next one a con man, but maybe that's how it works in the real). The thing is, you can already press Unlock the door while you're driving: the door won't open until you're still. So if you're almost at the station, unlock the door already and will actually unlock it as soon as you get to the stop. This can save a second or so and certainly save several seconds if you were used to waiting for a completed Goal message. The door will open when you see this message. Tip 3: I think you could also call it fraud and is really monitoring advice 2. The thing is, you can already set the gas while the door is still open! The train won't move until the door's locked. When you see this passengers </Route> loading time is almost over. set</SignalD>As soon as you see the locking command, lock the door and the train will start moving as soon as the door is locked. It will start to move while you see the next objectively complete message! Tip 4: While I use the tips 1, 2 and 3 myself to save time without losing peace :) I'm not using this 4th piece of advice, but if you're really late... It really cheats btw. The thing is, the game doesn't matter if you leave too early. As a test I did a service where I would leave as soon as possible and in the end I got all the greens, so even when I was told to wait after closing the door! During the test I arrived 5 minutes earlier and left two stations immediately after loading passengers and locking the door and although the window messages showed WAIT the game didn't even bother me driving forward. And the end result screen showed all the green icons! Now obviously you can cheat even by ignoring signs and speed limits, but well... I wouldn't do that. It would really ruin the whole (purpose) game. :) Note: This is only used for reporting spam, advertising and problematic (harassment, warfare or ruded) posts.
